## Journal Entries

Lab 1 - ER Diagrams

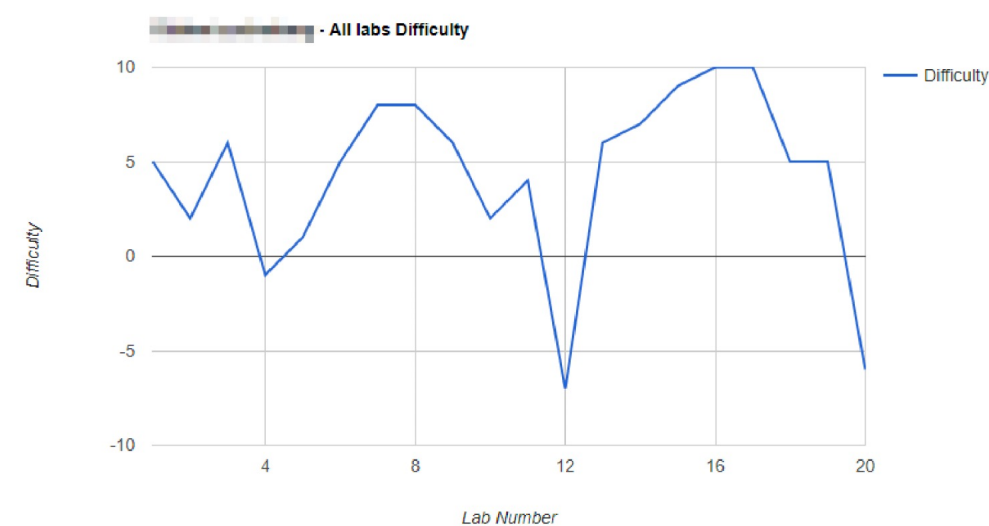

I'm really finding the workload difficult. Also I don't really have many friends on the course, so finding help is difficult and I'm totally new to programming. Maybe I'll get better, but I'm not sure.

# Check In

Track your progress in course labs.

This tool is a way of tracking and communicating your progress in Computer Science. You can see how your experience of a course changes over time and it allows your lecturers and tutors to identify when you might need extra support based on your feedback.

Journal Entry

## Journal Entry

Reflect on your work and progress in the course so far. How are you feeling about your studies in CS2003?

So far it's been really good. Although I've been struggling a bit with the workload. Hopefully I'll start understanding more as I go on.

## Journal Entry

Reflect on your work and progress in the course so far. How are you feeling about your studies in CS2003?

I'm really worried that I don't have enough time to finish all the course work. There are a lot of concepts that I don't understand. The tutors are not helping me.

It sounds like you are **having difficulty**. Do you feel you need extra support?

Negative - 91% Confidence
